ACCURACY LANDING - CROSS-COUNTRY

25 APRIL - 4 MAY 2025 DANGARA / TAJIKISTAN

Federation of aviation sports of Tajikistan, proud to invite you and your athletes to participate in the 2 nd Tajikistan Open cross country and accuracy landing, which will be held in Dangara, Tajikistan, April 25 - 4 May, 2025.

We guarantee high quality organization and competition – with the best international referees in order to guarantee maximum transparency, fairplay & impartiality for the athletes.

On behalf of the Organizing Committee, we would like to ensure that every possible effort will be made to provide a successful tournament of the highest technical level.

I look forward to seeing you in Dangara, Tajikistan

Yours faithfully,

**President of the Federation of paragliding and
ultralight aircraft Tajikistan**

Khayrulloev Abdullo

PARAGLIDING

ACCURACY LANDING - CROSS-COUNTRY

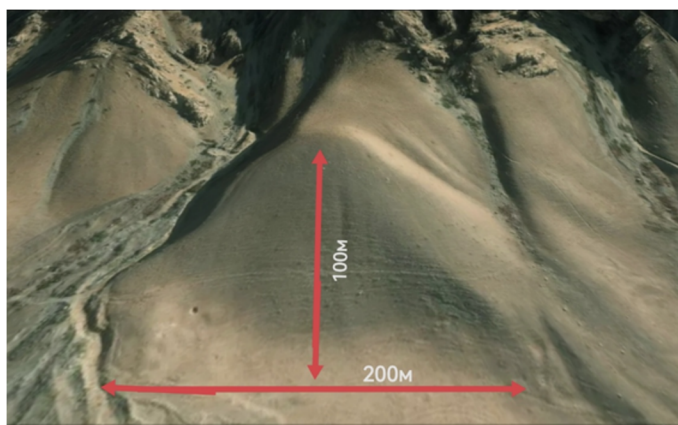

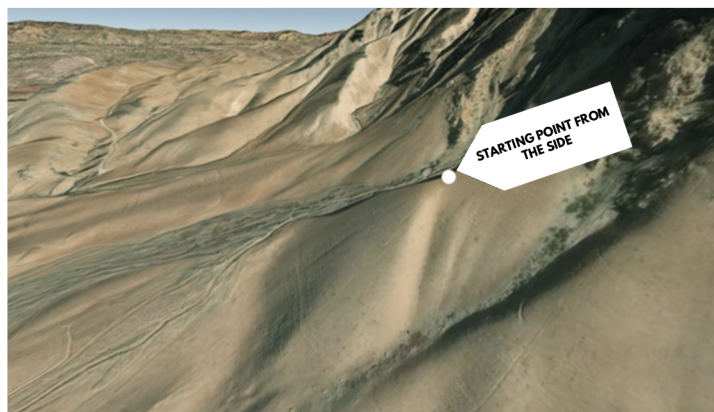

25 APRIL - 4 MAY 2025 DANGARA / TAJIKISTAN

Flying site

The Dangara district flight area is located 110 km from the capital of Tajikistan, the city of Dushanbe, which turns 100 years old this year. An asphalt road has been laid from Dushanbe to the starting point in Dangara, with a small segment, about 2 km., of a dirt road. The start is located a 5-minute walk from the road. From the western part of the ridge there is a large spacious platform that accommodates a large number of paragliders and allows 4-5 wings to launch in several rows at the same time. The slopes are earthen, covered with grass, their steepness is 35-45 °. The exposition of the launch is north-western. Wind direction and strength - north, northwest, northeast, 1-5 m/s, rarely up to 8 m/s. Route flights: along the mountains to the west and east, into the valley to the northwest and northeast. The lower boundary of clouds is 3000-4000 m, thermals +4 m/s. The terrain record is about 150 km.

Start Dangara - 1960 m ASL 43.126697, 76.467904. Landing – the average absolute height of the valley in the vicinity of Dangara is 900 m ASL. The height difference from the start to the landings below the mountain is about 1000 meters. There is a good landing right under the start. There are many good landing sites in the steppe and agricultural fields between small villages within the flight radius, the road infrastructure is well developed, among the obstacles are shallow ravines and power lines along the roads. The fields are large, some fields are made of cotton and have beveled stiff stems, it is necessary so as not to injure or damage the wing.
